

BRONZE GLOBE VALVES

Stainless Steel, Bronze and PTFE Disc

CHARACTERISTICS

1 → Description

PN 30 globe valves with body and bonnet in bronze Rg5. Bonnet threaded to the body without joint (metal seat).

2 → Sizes

These are manufactured in sizes $\frac{1}{2}$, $\frac{3}{4}$, 1, $1\frac{1}{4}$, $1\frac{1}{2}$ and 2 inches.

3 → Versions and references

As standard references, the following three valve types are manufactured with different seat systems:

- a) Bronze disc and integrated seat:
 - Threaded ends: Ref. 335 D Bronze.
 - Flanges ends: Ref. 336 D Bronze.
- b) Seat and disc in treated stainless steel:
 - Threaded ends: Ref. 335 D SS
 - Flanges ends: Ref. 336 D SS
- c) PTFE disc and integrated seat:
 - Threaded ends: Ref. 335 D T
 - Flanges ends: Ref. 336 D T

4 → Applications

To regulate the flow of a wide variety of fluids: water, air, steam, petroleum derivatives, etc., up to a maximum pressure of 30 bars.

5 → Manufactured upon request

These valves are manufactured in a limited series and upon request.
