

LAUNCHING EQUIPMENT FOR GAS BAGS

CHARACTERISTICS

① → Applications

The **Torre** launching equipment is used to insert inflatable stoppers (gas bags) into the pipe by means of a simple and efficient procedure.

② → Exclusive single launching tool system

The exclusive **Torre** launching system makes it possible to position the stoppers using one and the same launching tool.

③ → Gas-free environment

With the **Torre** launching equipment, throughout the entire process of drilling, inserting and removing the stoppers, complete air-tightness is maintained preventing gas leaks.

④ → Double launching

The equipment includes the elements necessary to install up to four stoppers in a single procedure.

⑤ → Equipment components

A detailed description of the components that make up each of the versions is included on the reverse side of this sheet

⑥ → Tool box

Made in damp-resistant plywood, with reinforced metal corner pieces. The inside is divided into compartments for correct equipment storage.

⑦ → Instructions

All the equipment is delivered with an instructions sheet, which makes use of illustrations to explain the entire drilling and launching operation in detail, in accordance with standard NT-520-GN, "Polyethylene pipe sealing procedure... "

⑧ → Equipment maintenance

To keep the equipment in good working order, it is advisable to carry out an annual check in the factory.
